

Airlock Security Expert (ASX) Training

1. Training goals

The expert training is for Airlock administrators who want to expand their knowledge in order to use Airlock to its fullest. After completing this training, participants know in detail about Airlock's advanced configuration options, as well as all the available Airlock modules.

2. Participants

- web application security experts
- Airlock administrators, certified Airlock Security Engineers (ASE)
- Airlock partners and solution providers

3. Content

- trouble shooting: analyzing network traffic using snoop, Wireshark and a proxy, log analysis, etc
- integration of an application protected by URL Encryption and Form Protection
- advanced configuration of the Airlock Authentication Service
- usage of external filter like AV, XML/SOAP filter, AMF, etc
- securing non-HTTP traffic by using SSL VPN
- role based displaying of applications within the portal

4. Administrative information

The training is taught by a member of Ergon's Airlock Professional Services team. It consists of 3 days, including extensive hands-on practical exercises and takes place at Ergon's premises at Arterstrasse 24, 8032 Zurich. The cost for the training, including certification, is CHF 2'850.- or EUR 2'200.-

5. Certification

To achieve ASX certification, participation in the Airlock Security Expert (ASX) training is recommended but not mandatory. Typical certification candidates are system administrators, network engineers and system integrators.

The examination lasts 60 minutes and usually takes place during the last day of the ASX training. It consists of a multiple choice test and covers all topics from the ASX training. Upon successful completion of the certification, the participant will receive his or her Airlock Security Engineer (ASX) certificate, which is valid for 3 years.

The certification cost is CHF 225.- or EUR 175.-.
